

School Life Guidance Form (Allergy Diseases)

Practical Use Guide

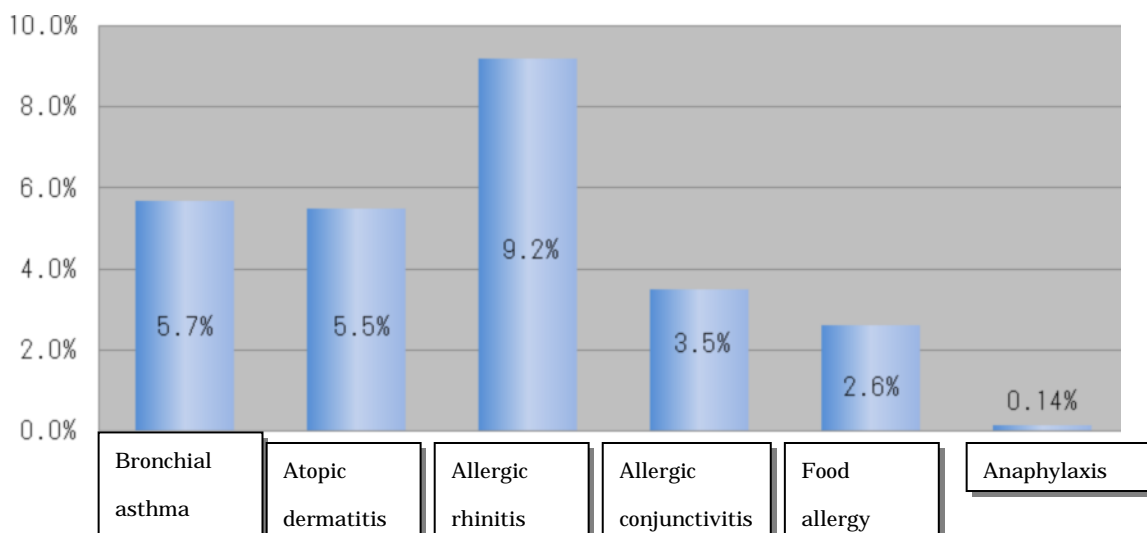

~ For Guardians ~

For guardians with children who suffer from allergies

According to research from the Ministry of Education, Culture, Sports, Science and Technology (MEXT), it is evident a large number of children in schools have allergy diseases. For safety and peace of mind for children who suffer from allergies, schools must have detailed information regarding the child's allergies.

We would like to ask you to submit the "school life guidance form", which concerns controls and considerations needed by children in school life, to the school.

Prevalence of Allergy Diseases in Young Pupils

Follow the below instructions while filling out the “school life guidance form”

Report any necessary controls or considerations regarding your child’s allergies. Take a copy of the “school life guidance form” from the school. Ask your doctor to fill out each part of the “school life guidance form” for each of the allergies.

When the doctor has finished the form, please return it to the school. Based on the “school life guidance form”, the school will discuss with the child’s guardian, controls and considerations for the child’s school life. (In such a time, the school will request detailed information as necessary.) The condition of the allergy may change and so in the event of necessary ongoing controls and considerations, as a general rule, please submit a new “school life guidance form” every year

The “school life guidance form” is composed as shown below

Both sides of the form can be filled out regarding allergic diseases.

表

Bronchial asthma, atopic dermatitis, allergic conjunctivitis

裏

Food allergy and anaphylaxis, allergic rhinitis

If you answer “yes” to bronchial asthma, food allergy or anaphylaxis, please write your emergency contact number.

Please have your doctor fill out the sections regarding your child’s allergies and additional notes for school life.

“Level of condition and medical treatment” section

The current condition of the child’s allergies, symptoms, allergy triggers and current medication are recorded in this section.

“Additional notes for school life” section

The necessary controls and considerations for school life are recorded in this area.

In times of an emergency, it may be necessary to share information recorded in the “school life guidance form” between members of staff. Please circle either “I consent” or “I do not consent” and sign.

The “school life guidance form” can be downloaded from the “school health” website <http://www.gakkohoken.jp>, which is ran by the Japanese Society of School Health.
